Get Connected

What is remote device access?

- A service that allows installing and testing applications on various Symbian OS-based Nokia devices over the Internet.
- Available to all Forum Nokia members, free of charge.
- What you can test:
 - Symbian, Java, Flash Lite applications
 - Browser applications (using WLAN to connect to the Internet), different types of content
 - Python, Open C.. (the plug-in is installed first, if needed)
- What you need:
 - A Forum Nokia user account
 - Java Web start, typically comes with Java runtime environment (JRE). JRE version 5.0 or newer is required.
 - A standard Web browser supporting Java script (such as IE, Mozilla Firefox..)
 - Internet connection allowing outgoing traffic to ports 80 and 1200 of the RDA server.

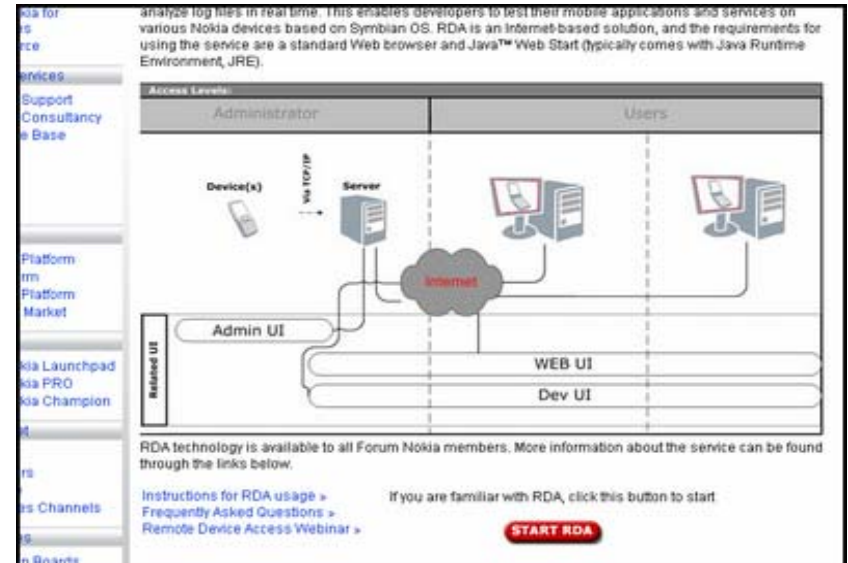

How to access the service

1. Go to <http://www.forum.nokia.com>

2. Remote Device Access is under the "Testing and Signing" section of the site.

3. On the RDA introduction page, click the "Start RDA" button.

How to access the service

Please log in Forum Nokia

To access this page, you must first log in by entering your F

User name:

Password:

4. Log in with your Forum Nokia user account.
