

Forum Nokia PRO Networks Zone

A New Opportunity to Generate New Revenue.

Forum Nokia PRO helps developer companies create mobile applications and services at an accelerated pace. As a member company, your organization will gain an inside track to technical services, tools, and business contacts aimed at reducing development time and, thus reducing your development cost.

Focus on SIP and IMS Mobile Services Development.

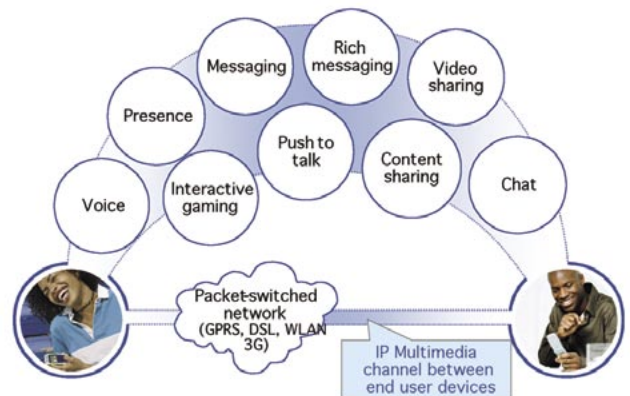

Forum Nokia PRO Networks Zone within Forum Nokia PRO facilitates development of Session Initiation Protocol (SIP) and IP Multimedia Subsystem (IMS) applications and services. Comprehensive resources are now available to all Forum Nokia PRO members to help you:

- Identify potential for generating new revenue through SIP or IMS mobile services offerings.
- Gain access to new technologies and classified interfaces to build new, richer applications.

Join Nokia in Building a New Foundation.

With Forum Nokia PRO Networks Zone, you can join Nokia in a strategic initiative to move mobile services from today's separate silo-based domains to a single, seamless experience. This vision of convergence is based on using SIP and IMS as core enablers. Together, we can further peer-to-peer and application IP connectivity for mobile and fixed devices using these technologies.

While you concentrate on application logic, Nokia will drive forward standardization, which we believe will lead to centralized services such as authentication, charging, and session setup. Through Forum Nokia PRO Networks Zone, you can gain an inside track to next generation applications and services — and ultimately new revenue.
